

## **To all Members of Environmental Courts Judiciary**

Every living thing has the right to survive and thrive. This is a basic truth: if it weren't true, life itself wouldn't make sense. We all share this right equally, and respecting it keeps life in balance and harmony.

However, previously fertile Australian land has become infertile due to exploitation through the use of legalised NPK farming that is also choking up waterways and depleting what water remains of oxygen, which in turn destroys marine life. This has now culminated in rivers that are dry creek beds that do not flow into the ocean anymore and Mono cropping fence-to-fence farming, with every tree removed, results in the desertification process being almost completed for regions that are *already* a toxic wasteland of Glyphosate and drift sand.

It is a familiar site to see livestock kept in toxic wastelands with no shelter in Australia's hottest regions. The stressful conditions that these animals endure is carried into the supermarkets through their meat which people consume, taking in the stress-related hormones produced by the livestock. Like wise, the systemic poisons that are used in food production can not be washed off as they are in every fiber of the produce resulting in the increasing amount of people suffering from food allergies, especially gluten intolerance aka Celiac Disease.

This axiom that we are all experiencing, and are effected by - because our most basic needs for survival are in rapid decline - shows that legislation is causing harm by protecting those responsible for causing harm. It shows that False wealth, as in Fiat Currency, is given priority over the most basic principles of morality that we all need to live by to be able to experience the true abundance of what our environment has to offer if we choose to live in harmony with ourselves and others and our environment.

True justice is required for everyone to experience good mental and physical and spiritual health. People witness livestock in unbearable conditions and console themselves with the moral relativism explanation that "this is okay because it is legal" and then look away. As a result, society is kept in a lower conscious, co-dependent mindset of confusion and chaos.

When everyone can make decisions about the best way to manage Australia's Natural Resources according to Natural Law then Australia's Justice system will be able to work towards the restoration of Australia's Natural Resources and better health for everyone.

We urge you to solemnly consider this opportunity to act for the well being of every individual in the community and to fulfill your moral responsibility as legitimate public servants by making your focus the immediate encouragement and return of the lawful Trial-by-Jury system as outlined in Magna Carta 1215, which is the single most powerful tool for the restoration of true lawful authority and true democracy, whereby the people live in harmony with Nature and self-organize according to their communities' interdependent needs and requirements for Autonomy.
